EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lori Beardell on 4/28/2004.

The application has been amended as follows:

In the claims:

In Claim 31, line 2, delete "1-SST" and insert --sucrose:sucrose 1-fructosyl transferase--.

The following is an examiner's statement of reasons for allowance: Claims 31-41 are deemed free of the prior art given the failure of the prior art to teach or reasonably suggest an isolated polynucleotide sequence encoding a sucrose:sucrose 1-fructosyl transferase having 90% sequence identity to an amino acid sequence of SEQ ID NO 14 and a plant and a seed transformed therewith, and a method thereof, wherein the nearest prior art teaches the cloning of the 1-sucrose:sucrose 1-fructosyl transferase cDNA from Jerusalem artichoke that encodes a polypeptide having 89% sequence identity to SEQ ID NO: 14 and transformed petunia plants (van der Meer I. *et al.*, Plant Journal 1998, Vol. 15, pp.489-500) and wherein the specification teaches an isolated polynucleotide encoding a sucrose:sucrose 1-fructosyl transferase of SEQ ID NO: 16 having 90% sequence identity to SEQ ID NO: 14. Further, the office interprets the Clustal V method of alignment as the clustal method using the default parameters set forth on pages 12, 30, 32 and 34 of the specification.

Art Unit: 1638

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
